Curriculum Vitae

Areeba Shakeel

📍 Hyderabad, Pakistan | ✉ areebashaikh2733@gmail.com

Profile Summary

Results-driven **Software Engineering Graduate** with professional experience in **Data Science, Backend Development, and Data Handling**. Skilled in transforming raw data into meaningful insights using **Python, Power BI, and Machine Learning**. Experienced in developing **web solutions, data-driven applications, and NLP projects**. Currently working at **Codexia Solutions** as a **Data Handler & Backend Developer**, with over **1 year of prior experience** at **Softnologic, Karachi**.

Education

🎓 **Bachelor's in Software Engineering**
CMS affiliated from Sindh University, Jamshoro| 2025

📜 **Certifications**

- Data Science – **Heist Institute**
- Python Development – **Mehran university**
- Data Science – **Mehran university**
- ACIT – **leeds Acadmey**

Professional Experience

Codexia Solutions – Hyderabad

Data Handler/Analyst & Backend Developer | 2025

- Designed and optimized **data pipelines** for efficient processing and transformation.
- Developed and maintained **backend services** in Python for data-driven applications.
- Implemented **data manipulation, cleaning, and mining workflows** for business needs.
- Worked on **machine learning models** for **threat detection, NLP tasks, and predictive analytics**.

Softnologic – Karachi

Backend Developer | 2024

- Built and maintained **backend APIs** for enterprise applications.
- Contributed to **data science projects** including **face detection, recognition, and IMDB dataset analysis**.
- Improved **data scraping and automation tools** for real-time insights.

Projects

- **Lean Production Analysis (IMDB Dataset):** Applied statistical analysis and ML models to extract insights.
- **Face Detection & Recognition:** Built Python/OpenCV-based solutions for security applications.
- **NLP Projects:** Developed models for **text classification and threat detection** using ML & DL.
- **Web Development Projects:** Backend development with **Python, Flask/Django, and REST APIs**.

Skills

Data Science & Analytics

- Data Mining, Data Handling, Data Manipulation, Data Cleaning
- Machine Learning (Supervised & Unsupervised), Deep Learning

- NLP (Natural Language Processing), Computer Vision
- Data Visualization (Power BI, Matplotlib, Seaborn)

Programming & Development

- **Languages:** Python, Java, JavaScript, C
- **Backend Development:** Flask, Django, REST APIs
- **Web Development:** HTML, CSS, JS (Basic to Intermediate)
- **Data Tools:** Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch
- **Scraping & Automation:** BeautifulSoup, Selenium, API Integration
- **Databases:** MySQL, MongoDB

Other Tools

- Power BI, Excel, Git/GitHub, Jupyter Notebook, Tableau

Strengths

✅ Strong problem-solving & analytical mindset
✅ Passion for **data-driven decision making**
✅ Quick learner of emerging technologies in **AI/ML**
✅ Effective collaboration in **team-based environments**
